Transportation packaging for car bumpers
Wood and corrugated cardboard packaging solution
Transport packaging

CONSTRUCTIONAL FEATURES

» Multi-material solution made from corrugated cardboard and wood
» The packaging consists of outer packaging, a milled wooden crate, an expander cable and clips for the wooden fittings
» Cushion foam protects the painted parts during transportation
» Packaging is easy to fill
» Using the expander cable makes it quick and easy to fix the car bumpers in position

CONSUMER BENEFITS

» The container is delivered assembled or flat-pack
» All components are located in the container which avoids additional deliveries having to be made
» Stackable in the warehouse and also during transportation

ENVIRONMENTAL ASPECTS/SUSTAINABILITY

» Easy separation of materials, therefore correct sorting for recycling
